- Additional mounting kits available for other locations
- Can be locked in place (padlock not included)

IT'S THE CHARGING STATION THAT GOES WHERE YOU GO.

Plug it into the wall and charge.

Unplug it, take it to your relatives'.

It's the latest in easy, moveable home charging.

The EVSE-RS Plug-In installs easily – all you need is a dedicated 240V service, our do-it-yourself mounting kit (included), and installation template (included). Mount a second bracket at your vacation home or another frequently visited location - and take the station with you for a convenient charge, any time.
