

Webasto Go™ High-Power Portable Charger

Next Generation Universally Applicable Level 2 EV Supply Equipment

Reliable charging starts with Webasto

Committed to a green future, Webasto Charging Systems offers comprehensive energy management and innovative e-Mobility solutions, including advanced charging stations, intelligent digital connectivity services, worldwide certified cordsets and industrial charging products. Our in-house design and engineering expertise ensures the highest grade in safety and automotive standards. Whether you are looking for high-volume, customized and white labeling solutions or our Webasto-branded products off-the-shelf, we provide the robust & reliable charging equipment for your needs.

With our Tier-1 global production plants, we excel in manufacturing high-quality, high-performance charging products while managing complex projects that meet stringent quality, safety, and performance requirements. Together with our partners and customers, we strive to pave the way for a sustainable future while making electrification easy, smart, and connected.

Key Features:

- Compact, lightweight, portable Level 2 Charger
- Easy to use, take it anywhere, simply plug-in and charge
- Globally certified according to established regulatory bodies
- Energy Star Certified, RoHS and REACH Compliant
- Multiple Vehicle Connector options (NACS, SAE J1772, IEC Type 2, GB-T)
- Possibility to integrate Wi-Fi and Bluetooth connectivity
- Grid plug temperature monitoring and de-rating for maximal safety and reliability
- Full performance at high temperature
- IP67 Rating can be submerged up to 3ft (1m)
- Interchangeable grid plugs for global use
- 3 LED status bar
- Customized branding and/or styling options
- Designed and engineered in California, USA & manufactured in Americas

This product is currently exclusively available for Automotive OEM (Original Equipment Manufacturer) use only. We are focusing on serving the Automotive OEM market exclusively at this time.

Compact & Lightweight

The next generation Webasto Go™ High-Power Charging Cordset is a high-quality Level 2 mobile EV Supply Equipment compatible with all electric vehicles and complies with the highest requirements of major automotive OEMs worldwide.

Weighing below 8lbs (4kg), the compact and lightweight cordset can be taken anywhere.

Flexible & Powerful

With up to 9.6kW charging power at 240V and a maximum output of 40A, you can power up your electric vehicle quickly and efficiently by fueling up to 40 miles of range per hour*. This is seven times faster than any standard level 1 cordset.

The newly designed swappable grid plug enables high-power charging in hundreds of countries across the world. The Webasto Smart Plug Technology automatically determines and sets the correct power level according to global technical and legal requirements, making charging anywhere in the world easier than ever.

Safe, Reliable & Certified

Your safety is our top priority. The cordset provides highly advanced safety features such as smart fault detection, grid plug temperature monitoring and de-rating for maximal security and reliability.

This easy-to-use device is Energy-Star rated and globally certified according to established regulatory bodies and surpasses stringent automotive standards for quality, safety, and performance.

The Webasto Go Gen 2 High-Power portable charger performs in the harshest weather conditions and under extreme temperatures. This portable cordset is the perfect companion for reliable, safe and secure charging at home and on the go.

Technical Specifications

	Webasto Go™ Gen 2 High-Power Portable Charger - Level 2
Max Current	40A (9.6 kW)
System Package	194 x 99.5 x 55 mm
AC Compatibility	85-265VAC, 45-65 Hz
Plug Type	NEMA and IEC types, Fixed & Swappable with thermal sensing
Cable	Safety rated and durable, either ~6.1m to 7.65m
Weight	below 4 kg (8 lbs)
Operating Temperature	-40°C (-40°F) to +85°C (185°F)
Indoor / Outdoor	IK09 (-40°C to 25°C) and IK10 (-25°C to 80°C)
Certified Altitude	13,123 ft (4000m)
Vehicle Connector Options	SAE J1772, NACS, IEC Type 2, GB/T
Certification	UL, CSA, NOM, IEC 62752, 61851, GB-T
HMI	3 LED HMI
Covered Standards	UL, cUL, NOM, CSA, IPC, IEEE, SAE, FCC, ASTM, ISO, NEMA, NEC, CE, CQC
Compliance	Energy Star Certified, RoHS and REACH Compliant
Connectivity	Wi-Fi, Bluetooth Connectivity on request

*The maximum charging speed depends on many factors including the size and condition of your vehicle's battery
